

Synopsis on
“Project Management System”

For
Zeal Education Society

By
Omkar Manohar Dhumal
Nikhil Suresh Devkar

Submitted to
SAVITRIBAI PHULE PUNE UNIVERSITY, PUNE
For the partial fulfillment of the internal credit work of
MASTERS OF COMPUTER APPLICATION SEM – I

Through

Zeal Education Society's
Zeal Institute of Business Administration,
Computer Application & Research (ZIBACAR)

Sr. No. 39, Narhe, Pune -411041, Phone No.:67206031
(Approved by A.I.C.T.E., New Delhi, Recognized by DTE, Govt. Maharashtra & Affiliated to S.P.P.U. Pune)

2025-2026

Project Synopsis	
A. Course Name	Masters in Computer Application (II nd Semester)
B. Student's Name	Omkar Manohar Dhumal Nikhil Suresh Devkar
C. Roll No	MC2527060 MC2527057
D. Project Title	Project Management
E. Name of Internal guide	Dr. Rupali Kalekar
F. Name of External guide	
G. Name of Organization	Zeal Education Society
H. Date of Submission	
Organization Profile	
1. Name	Zeal Education Society
2. Location	Narhe, Pune
3. About Organization	Zeal Education Society was started in 1996 and is a well-known education group in Pune. It offers professionals course in engineering, management, and computer applications. The society include institutes like Zeal Institute of Business Administration, Computer Application and Research (ZIBACAR), Zeal Institute of Management and Computer Application (ZIMCA), Zeal College of Engineering and Research (ZCOER). All these institutes are approved by AICTE, recognized by DTE, and affiliated with Savitribai Phule Pune University (SPPU). Zeal provides quality education that combines theory with practical knowledge. The campus has modern classrooms, well-equipped labs, and good facilities for students. It also promotes innovation, research, and entrepreneurship. Zeal aims to develop students into skilled, confident, and responsible professionals.

Project Details	
1. Abstract	The Project Management System is a web-based application designed to streamline and automate the project monitoring process for MCA students. The system enables the Project Coordinator (Admin) to create batches, assign faculty mentors, allocate students, and define customizable project stages such as Synopsis, Introduction, Analysis & Design, User Manual, and Final Submission. Students can upload required documents in PDF/DOC/PPT formats, and faculty members can review, approve, or reject submissions with remarks. The system provides email notifications, deadline tracking, late submission alerts, and role-based access control. This solution reduces manual paperwork, enhances transparency, and ensures systematic monitoring of academic projects.
2. Existing system	Currently, the project monitoring process is managed manually using physical documents, emails, and spreadsheets. Students submit reports directly to faculty members, and tracking submission status is time-consuming. There is no centralized platform to monitor progress stage-wise. Communication gaps may occur regarding deadlines, approvals, and remarks. Faculty and project coordinators need to manually maintain records, which increases administrative workload and chances of error.
3. Proposed system	The proposed system is a web-based Project Management System that centralizes the entire project monitoring process. The system includes three main roles: Admin (Project Coordinator), Faculty (Mentor), and Student (Mentee). The Admin can create and manage batches, assign mentors, upload

	students in bulk through Excel, customize project stages, and set expected submission dates. Students can upload documents, view deadlines, and track remarks. Faculty members can review submissions, approve or reject them, and provide feedback. The system also generates automatic email notifications and late submission alerts. The application will be responsive and accessible across devices.
4. Scope of the System	1. Role-based login and dashboard system. 2. Batch creation and mentor-student assignment. 3. Customizable project stages with deadlines. 4. File upload and download functionality. 5. Approval and rejection workflow. 6. Email and in-app notifications.
5. Objectives of System	1. To minimize administrative workload of the Project Coordinator. 2. To provide a centralized submission and approval system. 3. To reduce paperwork and manual record maintenance. 4. To implement a secure and role-based access control system. 5. To ensure transparency in student evaluation. 6. To provide deadline tracking and late submission alerts.
6. Environment	
a) Operating system	Windows 11
b) Front End	HTML5, CSS3, JavaScript
c) Back End	PYTHON 3.13.9 (Flask Framework)

7. Any other (please specify)	MONGODB (7.0) for Database
